About Niche's 2019 K-12 Rankings

What is Niche?

Niche is a website that helps you discover the schools, companies, and neighborhoods that are right for you. We rigorously analyze dozens of public data sets and millions of reviews to produce comprehensive rankings, report cards, and profiles for K-12 Schools, Colleges, Places to Live, and Places to Work. Every month, millions of families use Niche to research public and private K-12 schools.

Where Our Data Comes From

Niche has the most comprehensive data available on U.S. public and private K-12 schools and districts. We rigorously analyze data from the U.S. Department of Education and over 60 million K-12 school reviews and survey responses to help families find the right school for them.

What Makes Our K-12 Rankings Unique?

The Niche 2019 K-12 Rankings are based on rigorous analysis of academic and student life data from the U.S. Department of Education along with test scores, college data, and ratings collected from millions of Niche users. Because we have the most comprehensive data in the industry, we're able to provide a more comprehensive suite of rankings across all school types.

Families from every corner of America and every background use Niche to research schools, so our rankings are intended to be useful to a wide range of families and filterable by type and location. Our rankings strive to reflect the entire school experience, including academics, teachers, diversity, student life, and student outcomes. We also believe that each school is so much more than just one ranking number. That's why we have in-depth profiles on each school and district and also assess them across a number of factors to produce annual graded Report Cards for each school and district. This year, nearly 100,000 schools and districts received a Niche ranking and 2019 Report Card.

What's New for 2019

All of our K-12 rankings have been updated to reflect the latest data available as well as millions of new reviews we've collected from students and parents over the last year. This year we are newly ranking nearly 6,000 schools, with 4,000 schools providing data directly to us by claiming their school.

We continue to develop rankings that cover a wide variety of topics. Our 2019 Best High School Sports, which for the first time incorporates state championship data, recognizes strong and vibrant athletic programs. Additionally, our 2019 Best Schools for the Arts recognizes schools that have a focus on performing and visual arts. We're also recognizing 2019 Niche Standout Schools to highlight public schools that are making a difference in their community. Lastly, we introduced a variety of filters on our rankings so you can search by more locations and drill down to find the school that is right for you.
